

PLACEBO EFFECT

A PILL THAT GIVE YOU TO TREAT

YOUR BRAIN IS THE MOST POWERFUL TOOL

It influences your every action along with healing. Even sometimes, a fake treatment may have a real therapeutic effect. **This is termed as placebo effect**. A healing generated by your own brain

PLACEBO & PLACEBO EFFECT are two different things.

placebo pills

Placebo is the pill that is given on the name of medicine, it is just anything normal substance, an inactive substance. **The placebo effect is the effect of placebo that has no known effect itself.**

The hormonal response, conditioning, mental expectations, Genetic or Nocebo effect are the general theories given as the explanation of placebo effect.

placebo to the patient

As we give placebo to the patients,

the blood pressure, pulse rate and reaction rate increases, which leads the body to generate hormones, that leads to the effect similar to the **physiotherapeutic treatment**.

This suggests the body's infinite **capability to heal** itself. Here we can also conclude that the Psychological treatment, proves to be **more effective than the physiotherapeutic treatment**.

SAVE YOUR

PLACEBO EFFECT

A PILL THAT GAVE YOU TO BELIEVE

YOUR BRAIN IS THE MOST POWERFUL TOOL

It influences your every action along with feeling. Even sometimes, a fake treatment may have a real therapeutic effect. This is termed as placebo effect. A feeling generated by your own brain.

PLACEBO & PLACEBO EFFECT are two different things.

placebo pills

Placebo is the pill that is given on the name of medicine. It is just anything normal substance, can't be the substance. The placebo effect is the effect of placebo that has no known effect itself.

The hormonal response, conditioning, mental expectations.
Genetic or Nocebo effect are the general theories given as the explanation of placebo effect.

placebo to the patient

As we give placebo to the patients,

the blood pressure, pulse rate and reaction rate increases when we ask the body to generate hormones, that leads to the effect similar to the psychotherapeutic treatment.

This suggests the body's infinite capability to heal itself. Hence we can also conclude that the psychological treatment, proves to be more effective than the psychotherapeutic treatment.

PLACEBO EFFECT

A PIL. THAT GAVE YOU TO BEAT

YOUR BRAIN IS THE MOST POWERFUL TOOL

It influences your every action along with feeling. Even sometimes, a fake treatment may have a real therapeutic effect. **This is termed as placebo effect.** A healing guaranteed by your own brain.

PLACEBO & PLACEBO EFFECT are two different things.

placebo pills

Placebo is the pill that is given as the name of medicine. It is just anything, normal substance, or inactive substance. **The placebo effect is the effect of placebo that has no known effect itself.**

The human response, conditioning, mental expectation, Genetic or Biocubic effect are the general factors given as the explanation of placebo effect.

placebo to the patient

As we give placebo to the patients,

the blood pressure, pulse rate and reaction rate increases which leads the body to generate hormones. But none of the effect is due to the **physiological treatment.**

It is suggest the body's **intrinsic capability to heal** that. When we can also conclude that the psychological treatment, proves to be **more effective than the physiological treatment.**
